

Como preencher as informações do tema

Acesso o [codex Wordpress](#) e busque por: **Theme Stylesheet**

Theme Stylesheet

In addition to CSS style information for your theme, *style.css* provides details about the Theme in the form of comments. The stylesheet **must** provide details about the Theme in the form of comments. **No two Themes are allowed to have the same details** listed in their comment [headers](#), as this will lead to problems in the [Theme selection dialog](#). If you make your own Theme by copying an existing one, make sure you change this information first.

The following is an example of the first few lines of the stylesheet, called the stylesheet header, for the Theme "Twenty Thirteen":

```
/*
Theme Name: Twenty Thirteen
Theme URI: http://wordpress.org/themes/twentythirteen
Author: the WordPress team
Author URI: http://wordpress.org/
Description: The 2013 theme for WordPress takes us back to the blog, featuring a full range of post formats, each displayed beautifully in their own unique way. Design details abound, starting with a vibrant color scheme and matching header images, beautiful typography and icons, and a flexible layout that looks great on any device, big or small.
Version: 1.0
License: GNU General Public License v2 or later
License URI: http://www.gnu.org/licenses/gpl-2.0.html
Tags: black, brown, orange, tan, white, yellow, light, one-column, two-columns, right-sidebar, flexible-width, custom-header, custom-menu, editor-style, featured-images, microformats, post-formats, rtl-language-support, sticky-post, translation-ready
Text Domain: twentythirteen

This theme, like WordPress, is licensed under the GPL.
Use it to make something cool, have fun, and share what you've learned with others.
*/
```

Copie todas estas informações em forma de comentário. O Wordpress irá ler estes comentários e estas informações serão as informações do seu tema.

Copie e cole na sua folha de estilo (*style.css*). O exemplo a seguir é apenas com a finalidade de demonstração. Eu recomendo que você acesse o link acima e copie diretamente da documentação oficial, para se certificar de que estará utilizando o código mais atual.

```
/*
Theme Name: Twenty Thirteen
Theme URI: http://wordpress.org/themes/twentythirteen
Author: the WordPress team
```

Author URI: <http://wordpress.org/>

*/

E veja como fica depois que eu coleí na minha folha de estilo e preenchi com os dados corretos:

The screenshot shows a WordPress theme preview interface. On the left, there is a large image of a desk setup with a computer monitor displaying a grid of colorful photos, a keyboard, a mouse, and a mug. On the right, the theme details are displayed: a 'Tema ativo' badge, the theme name 'WordpressDev' with 'Versão: 1.0', the author 'Patrick Castheliano', a description 'Este tema pertence a um projeto público onde eu compartilho meus estudos sobre a criação de um tema de Wordpress.', and tags 'phototricks, estudo'. At the bottom, there are two buttons: 'Personalizar' and 'Theme Check'.
